

REDID NOTES FOR 660106 *

Software process

- creative
- step-by-step (process programming)

Process

this is the life cycle of a process

Req. Analysis

→ system design

→ program design

→ implement (code)

→ unit & integration test

→ system test

→ acceptance test

→ maintenance

Waterfall

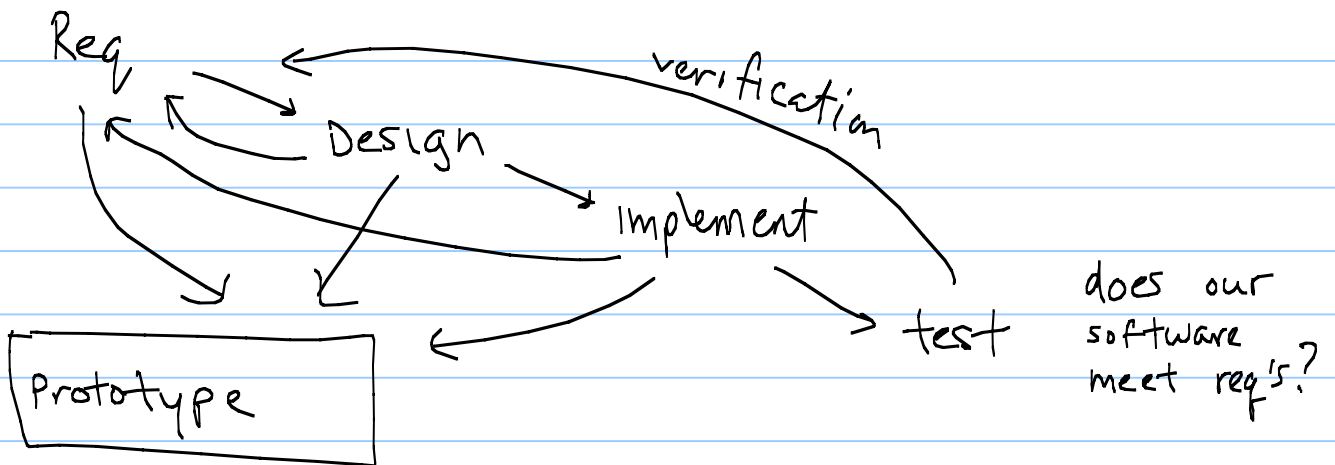

Software

Process

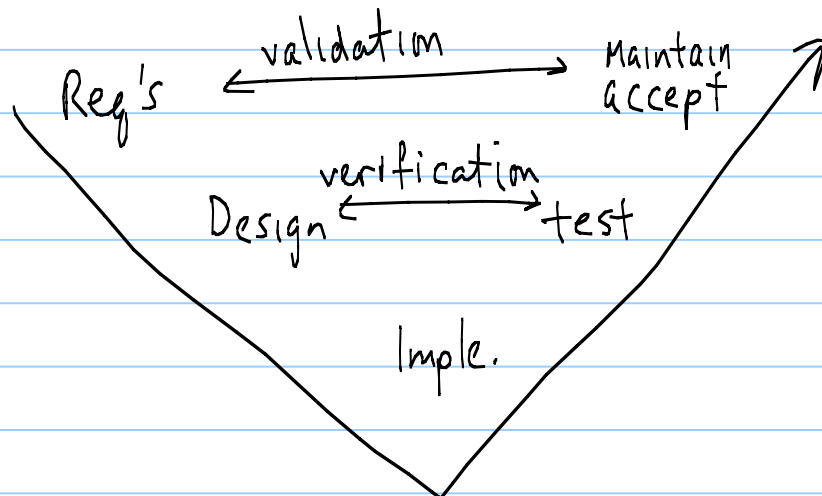

Model

It would be good to have feedback, so there should be loop back to Req, or Design...

Also, should have user/client to be involved, to see if our product is good or not. i.e: make a prototype, show client, then loop back...

V-Model

Prototyping
