

# Modelling Dynamic Structure Reactive Systems

Simon Van Mierlo

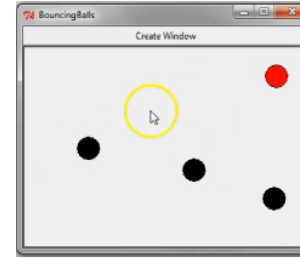

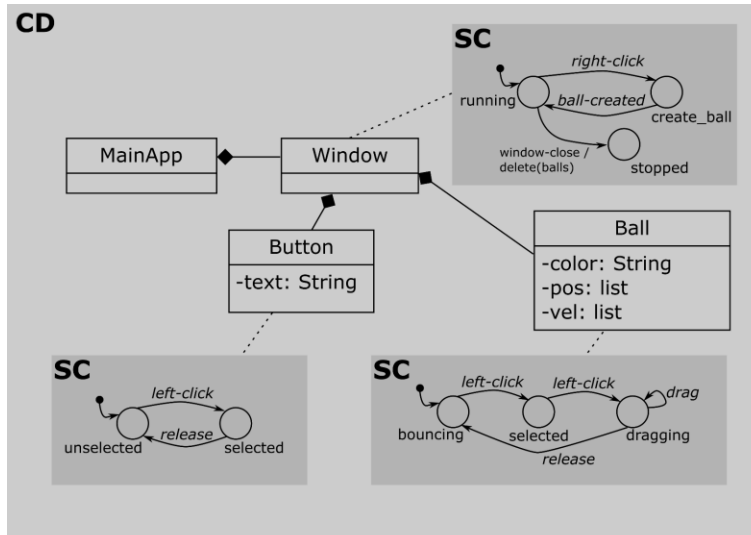

# Why?

Behaviour:

- Timed
- Reactive
- Dynamic-Structure
- Independent
- Adaptive

# What?

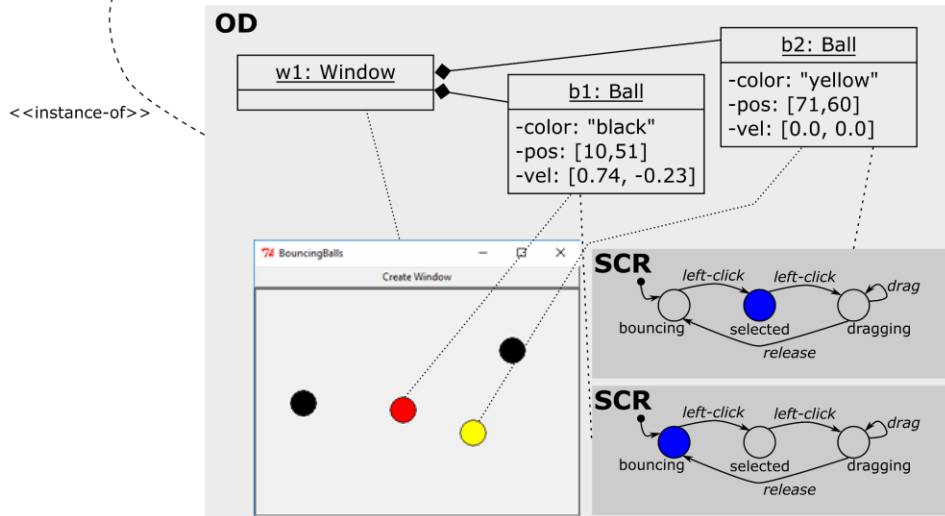

Statecharts +  
Class Diagrams  
= **SCCD**

**Independent Agents:**

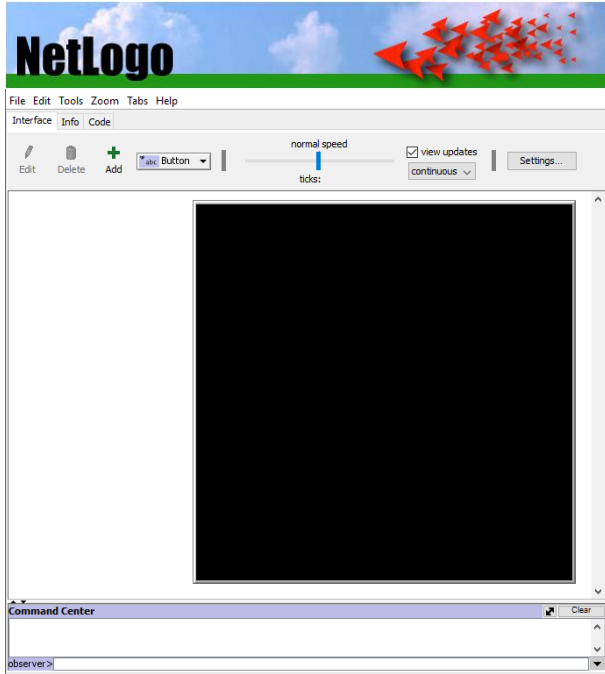

- Desires
- Beliefs
- Intentions

Loose Couplings

Distributed Control

# How?

Generalize Syntax + Semantics

Behaviour:

- Timed
- Reactive
- Dynamic-Structure
- Independent
- Adaptive

MAS Lan.

Denotational Semantics

SCCD

REFINE

SCCD++

- Exceptions
- Dynamic Loading
- Interfaces
- Subtyping
- Object Referencing

# Roadmap

- Low-Hanging Fruit:
  - “Fix” SCCD (-> SCXML)
  - Object Behaviour Pattern
  - Testing/Verification of SCCD
- Master Thesis:
  - Figure out MAS/BAM, syntax + semantics
  - Formalize, map onto SCCD
- Later:
  - Deployment
  - Adaptive
